The interview questions, talking points, sample answers, scenarios, and recommendations contained herein are based on the author's professional consulting experience across multiple Infor implementations, support engagements, upgrades, and migrations. They are intended as a study and preparation aid only. Specific behavior, screen labels, table names, parameter codes, and process steps may vary between feature packs, customer-specific customizations, and country localizations.

## DISCLAIMER &amp; READER ACKNOWLEDGEMENT

# Use With Care

*Reader's responsibility · Author's intent*

This book is a **preparation companion**, not an Infor product manual. Every effort has been made to ensure accuracy, but Infor products evolve through feature packs, country packs, and patches; the same module may behave differently between versions. Always validate behavior against the actual customer landscape, the relevant Infor documentation set, the Knowledge Base on Infor Concierge / Infor Support Portal, and tested results in a sandbox before relying on any answer here in a production decision.

The "expected answers" embedded throughout this book are *talking points* — the kind of language and structure interviewers find credible. They are deliberately not phrased as one-liner cheat-sheet responses. Real interview success comes from internalizing the *why* behind each point and weaving it into your own consulting voice.

## A NOTE FROM THE AUTHOR

LN Administration interviews favour candidates who can describe the runtime — bshell processes, database connections, user sessions, backup cycles — without panic. Practice the operations rhythm aloud — Monday morning health check, batch jobs, period close, audit prep.

FullOnBaan, the author, and any contributors disclaim all liability for any decision, configuration, project outcome, employment outcome, or commercial result attributed wholly or partly to the contents of this book. By reading further you acknowledge and accept this disclaimer.

## ABOUT THE PUBLISHER

# FullOnBaan

*Comprehensive Infor ERP LN Training Programs*

FullOnBaan is a focused training and enablement ecosystem dedicated entirely to the Infor LN / Baan product family. Built and curated by practitioners, it serves consultants, key users, project managers, and enterprises preparing to implement, support, upgrade or migrate Infor LN environments.

The ecosystem currently spans:

## TRAINING COURSES

## READER'S GUIDE

# How to Use This Book

*Get the most out of every page*

This volume is sequenced so that each chapter builds the depth a hiring panel will probe. The progression — fundamentals, modules, configuration, process flow, integration, support, migration, project, senior-level, behavioral, version-specific — mirrors the real arc of a complete interview cycle.

## FOR THE 7-DAY SPRINT

Days 1–2: foundational chapters. Days 3–4: deep functional chapters. Day 5: configuration + process. Day 6: support + migration + project. Day 7: senior + behavioral + cheat sheet.

## FOR THE 14-DAY DEEP-DIVE

One chapter per day, with a 30-minute mock interview at the end of each day. Re-read after day 7, focusing only on questions you stumbled on the first time.

## FOR THE SAME-DAY EMERGENCY

The cheat-sheet chapter, the senior-level chapter, and the version-specific section. Skim talking points, not whole answers.

Every question is annotated with one or more *tags* indicating where it most often surfaces — Implementation, Setup, Process, Support, Migration, Project, Senior, Behavioral, Compliance, UX, Reporting. Treat these as a heat-map for your weakness areas.
