The interview questions, talking points, sample answers, scenarios, and recommendations contained herein are based on the author's professional consulting experience across multiple Infor LN implementations, support engagements, upgrades, and migrations spanning versions 10.5 through 10.8. They are intended as a study and preparation aid only. Specific behavior, screen labels, table names, parameter codes, and process steps may vary between feature packs, customer-specific customizations, and country localizations.

## DISCLAIMER &amp; READER ACKNOWLEDGEMENT

# Use With Care

## *Reader's responsibility · Author's intent*

This book is a **preparation companion**, not an Infor product manual. Every effort has been made to ensure accuracy, but Infor LN evolves through feature packs, country packs, and patches; the same module may behave differently between 10.5, 10.6, 10.7 and 10.8 environments. Always validate behavior against the actual customer landscape, the relevant Infor documentation set, the Knowledge Base on Infor Concierge / Infor Support Portal, and tested results in a sandbox before relying on any answer here in a production decision.

The "expected answers" embedded throughout this book are *talking points* — the kind of language and structure interviewers find credible. They are deliberately not phrased as one-liner cheat-sheet responses. Real interview success comes from internalizing the *why* behind each point and weaving it into your own consulting voice.

### A NOTE FROM THE AUTHOR

You will not impress an experienced interviewer by reciting these answers verbatim. You *will* impress them by understanding the underlying mechanics, anticipating the next question, and offering a story from your own work that proves you have lived it. Use this book as a sparring partner, not a teleprompter.

FullOnBaan, the author, and any contributors disclaim all liability for any decision, configuration, project outcome, employment outcome, or commercial result attributed wholly or partly to the contents of this book. By reading further you acknowledge and accept this disclaimer.

## ABOUT THE PUBLISHER

# FullOnBaan

*Comprehensive Infor ERP LN Training Programs*

FullOnBaan is a focused training and enablement ecosystem dedicated entirely to the Infor LN / Baan product family. Built and curated by practitioners, it serves consultants, key users, project managers, and enterprises preparing to implement, support, upgrade or migrate Infor LN environments.

The ecosystem currently spans:

## READER'S GUIDE

# How to Use This Book

*Get the most out of every page*

This volume is organized into twenty-two chapters, sequenced so that each chapter naturally builds the depth a hiring panel will probe. The progression — fundamentals, modules, configuration, process flow, integration, support, migration, project, senior-level, behavioral, version-specific — mirrors the real arc of an end-to-end Infor LN Finance interview cycle.

Three reading patterns are recommended:

## FOR THE 7-DAY SPRINT

Days 1–2: Chapters 1–6 (foundations + sub-ledgers). Day 3: Chapter 7–10 (cost, tax, reporting, closing). Day 4: Chapters 11–13 (multi-currency, integration, methodology). Day 5: Chapters 14–16 (configuration, process, support). Day 6: Chapters 17–19 (migration, project, senior). Day 7: Chapters 20–22 (behavioral, version-specific, cheat sheet).

## FOR THE 21-DAY DEEP-DIVE

One chapter per day, with a 30-minute mock interview at the end of each day where a friend asks the questions and you answer aloud. Re-read the book after day 14, focusing only on the questions you stumbled on the first time.

## FOR THE SAME-DAY EMERGENCY

Chapter 22 (Cheat Sheet), Chapter 19 (Senior-level patterns), and the version-specific section in Chapter 21. Skim talking points, not whole answers.

Every question is annotated with one or more *tags* indicating where it most often surfaces — Implementation, Setup, Process, Support, Migration, Project or Senior. Treat these as a heat-map for your own weakness areas.
